
Level 6

# MACHINE TIME ISN’T CHEAP

```
FAB-42 > operating system ..... FULLY OPERATIONAL
FAB-42 > incoming challenge ... PER TICK
```

FAB-42 is built and fully operational.

Dr. Ångström invites everyone into the lab. Everyone must compete to produce a list of patterns.

**The shortest programs win.**

# Now you’re a real programmer.

- You are given a list of patterns and how many times each must be submitted
- **For each, generate a program that creates the pattern the required number of times**

# This level is an optimization level.

- Your score is the total number of instruction lines in your programs
- A lower score is better

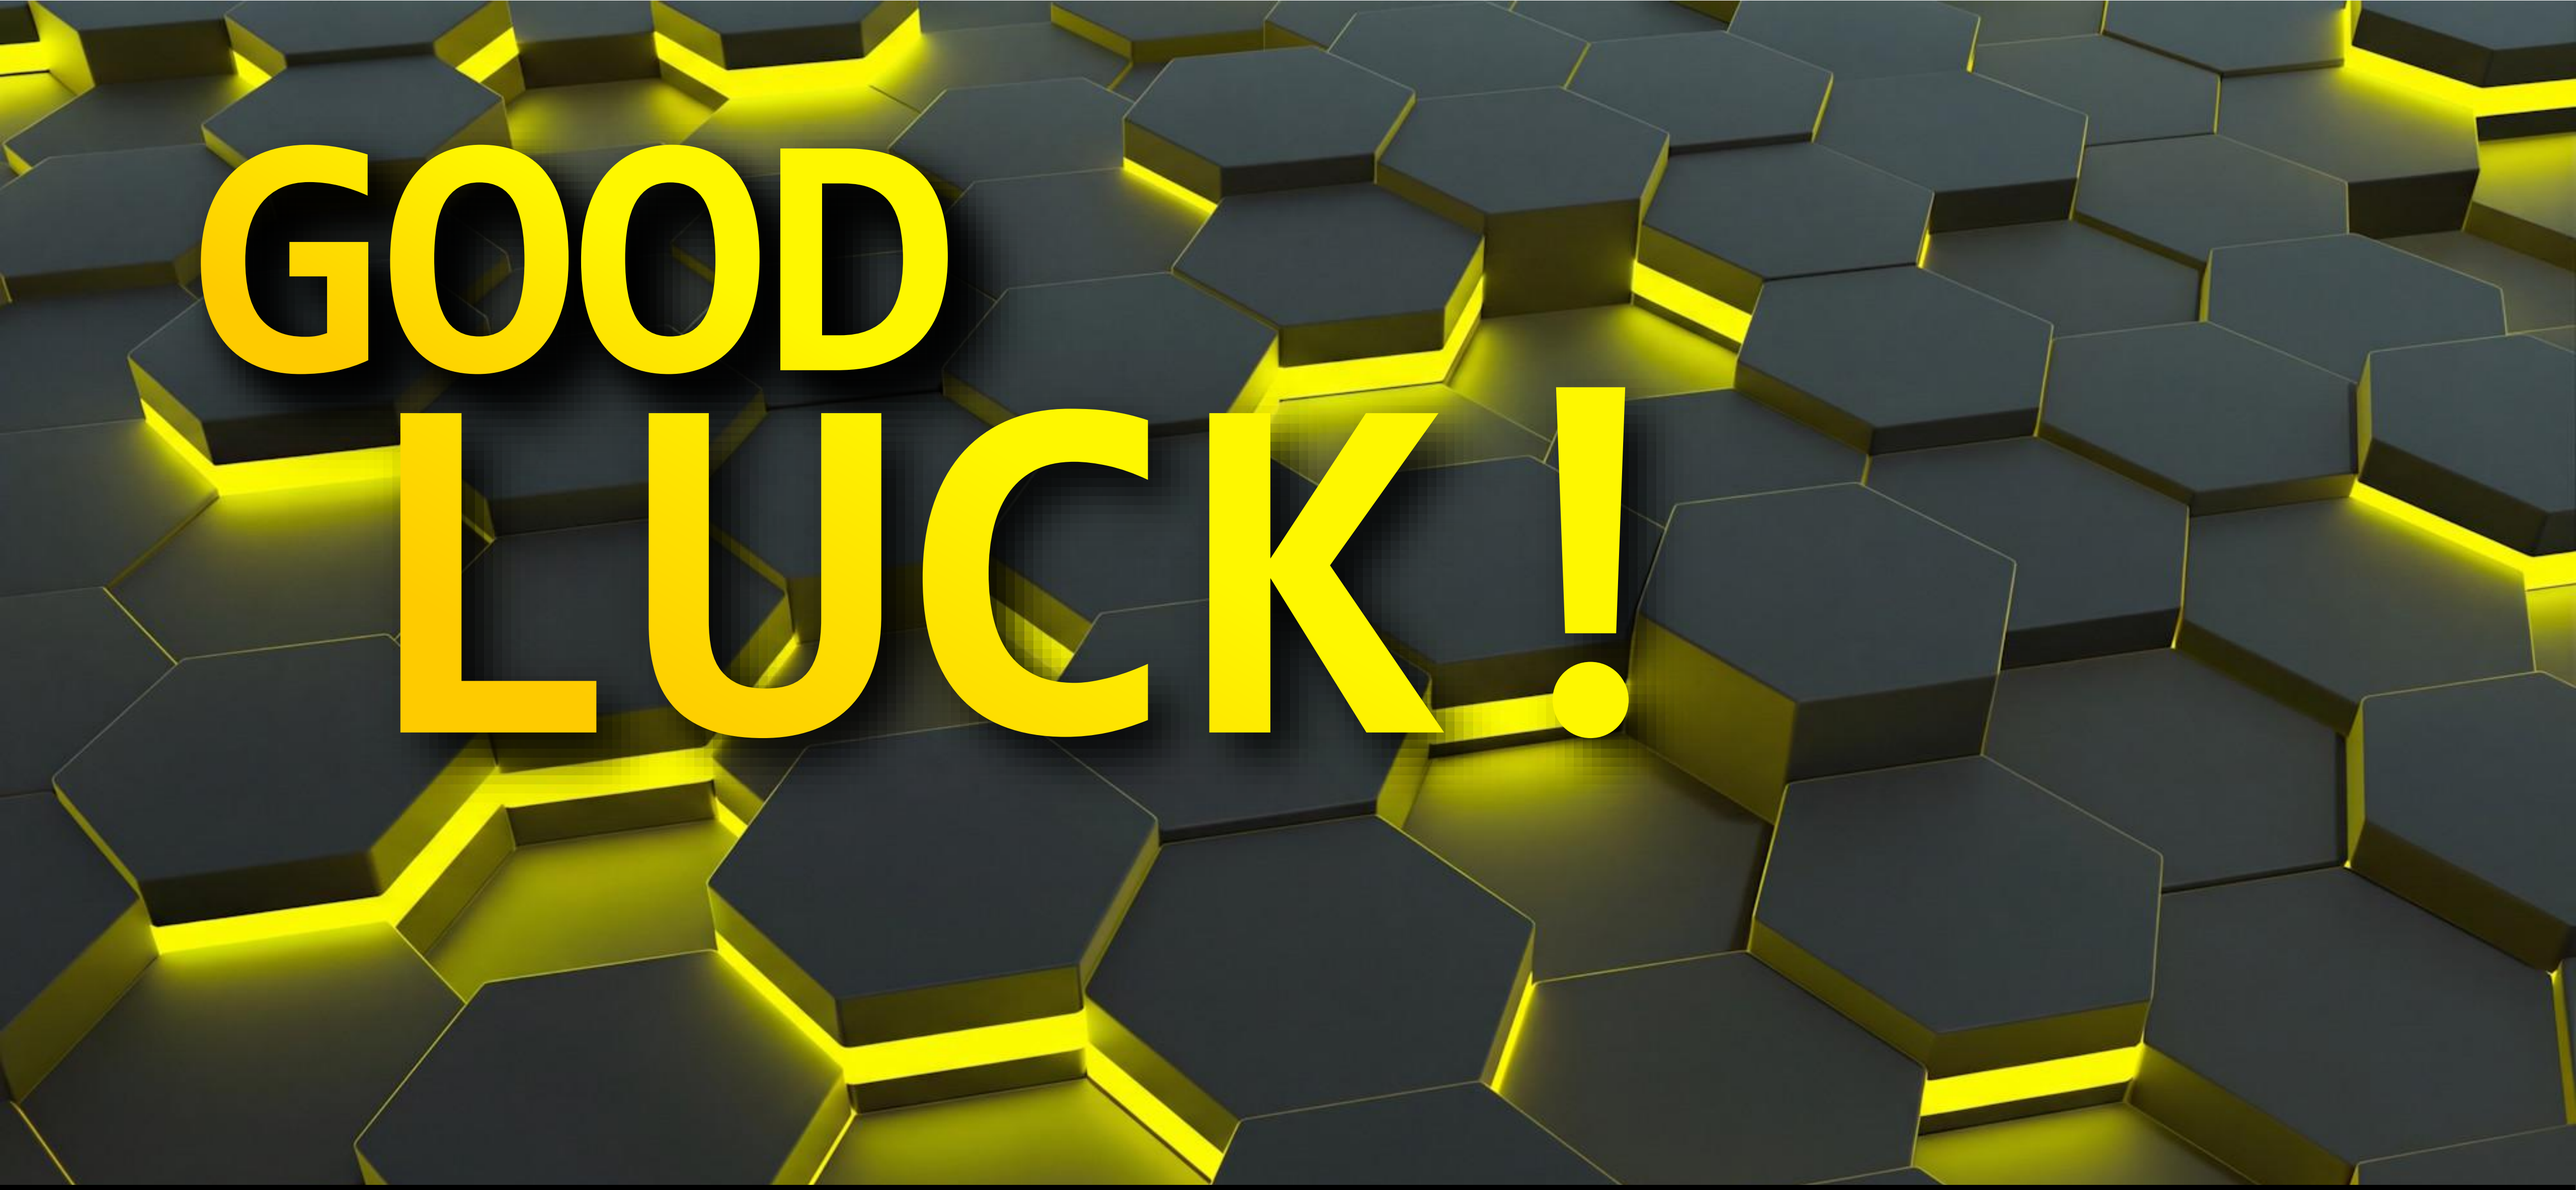

# Input

| Name | | Description | Example |
|---|---|---|---|
| N | | Number of patterns | 3<br>3 7 13 3<br>---*-*-*-*---<br>--*-O-O-O-*--<br>-*-O-M-M-O-*-<br>*-O-M-O-O-O-*<br>-*-O-M-M-O-*-<br>--*-O-O-O-*--<br>---*-*-*-*---<br><br>3 7 13 1<br>---*-*-*-*---<br>--*-M-M-M-*--<br>... |
| repeated N times | Pattern info | The radius of the board, the number of rows, the number of columns, and the **required count**, separated by spaces | |
| | Pattern | The character representation of a pattern | |
| | *Empty line between patterns* | | |

# Output

| Name | | Description | Example |
|---|---|---|---|
| repeated N times | Program | A list of instruction lines<br>Each line contains 6 instructions, separated by spaces | F - - - - -<br>F - - - - -<br>- - B - - -<br>- - B - - -<br>- - T - - -<br>- - F - - -<br>- - F - - -<br>B - - - - -<br>- - F - - -<br>- - B - - -<br>... |
| | *Mandatory empty line between programs* | | |
