
Level 6

No time for caution

- The time limit is now significantly shorter
- It does not require an optimal solution
- All other rules from the previous level apply

format identical to previous level

Input

Name		Description
N		Number of cases
repeated N times	Space station and time limit	The X-position and the Y-position of the space station separated by a comma Followed by the time limit separated by a space
	Asteroid	The X-position and the Y-position of the asteroid separated by a comma

Example

```
3
6,0 58
3,0
